Loover™

Vue Mesh is a combination of elastic and non stretch fibers woven together to provide a flexible back that will provide custom support for each user and a supportive non rigid lumbar support. The lumbar and back support are height adjustable so back support is applied exactly where you need it. Vue Mesh is available in a choice of 10 colors with coordinating Match fabric for the seat. Loover can also be upholstered in your choice of many fabrics and leathers.

2662-8 Medium Back with weight sensing mechanism. Shown in Sand (MT21) and Vue Mesh, Sandy Beach (VU10).

2662-8 Medium Back with weight sensing mechanism. Shown in Sand (MT21) and Vue Mesh, Sandy Beach (VU10).

Loover™

Weight Sensing Mechanism. Tilt-tension automatically adjusts to each user.

The Loover synchronized mechanism incorporates the next generation of intuitive ergonomics. The chair senses the user's weight and automatically adjusts the tension of the tilting action so it will be comfortable for each user. The torque requirement automatically changes for each user from the smallest individuals to the more generous in size without the need for any manual adjustment. The stretch mesh changes its shape to match your body. Together they promote healthy movement, proper spinal alignment support and comfort.

Above: 2661-8 shown in Match, Burgundy (MT29) and Vue Mesh, Red Rose (VU18).

A. Vue Mesh provides a flexible back that allows custom support for each user. **B.** Height Adjustable Arms are standard on all Loover task chairs. **C.** Armcaps slide forward & back to accommodate both taller or smaller users. **D.** Width Adjustable Arms (WA) are standard on all Loover chairs.

Cover: 2661-3 and 2662-8 shown in ArcCom Block Party, Mist (YEV2) and Vue Mesh, Coal Black (VU19).
